

Samples drawn as crops enter your stores are by far the most accurate way to assess the quality of your harvested crop.

1 – Sample the grain as it comes into store, take a sample from each trailer.

2 – Sample the grain as it leaves the drier or cleaner.

3 – Create a bulk sample from the above procedures in a large bucket or container. Aim for 1 sample per 100t (Malting & Milling) or 1 sample per 200t for feed.

4 - Thoroughly mix the sample and fill a sample bag excluding all the air, ensure the bag is tightly sealed.

Return sample/s to Robin Appel Ltd in one of 2 ways

1. Return the sample to us in the FREEPOST envelopes provided (1 sample per bag) please do not exceed 2kg/parcel.
2. Ring 01489 896388 to arrange for us to collect your samples ourselves or arrange a courier for you.

Grain location and labelling bags:

If the grainstore is not already labelled, use the following method (depending on size of store):

Enter the barn and face the heap of grain, the area furthest from you is the back.

Back of Store		
Left	Middle	Right
Bay 1 L	Bay 1 M	Bay 1 R
Bay 2 L	Bay 2 M	Bay 2 R
Bay 3 L	Bay 3 M	Bay 3 R
Bay 4 L	Bay 4 M	Bay 4 R
Front		

Please provide as much information as possible on the sample bag.
